

MARK ANGELO YAKIT

GoHighLevel Systems Builder | CRM & Automation Specialist | Full-Stack Web Developer

Prosperidad, Agusan del Sur | +63 964 890 2655 | info.yakit@gmail.com | linkedin.com/in/info-yakit

PROFESSIONAL SUMMARY

Systems-focused GoHighLevel specialist with hands-on experience building CRM foundations, funnels, websites, pipelines, workflows, AI-assisted automations, and third-party integrations for service businesses and digital agencies. Skilled at translating business processes into reliable systems, testing workflow paths, troubleshooting technical issues, documenting SOPs, and delivering clear team handoffs.

TECHNICAL SKILLS

CRM and Automation: GoHighLevel, CRM setup, pipelines, opportunities, workflow automation, lead routing, round robin, forms, surveys, calendars, email and SMS nurturing

API and Private Integrations: GHL Private Integrations, REST APIs, webhooks, API keys, OAuth, field mapping, Zapier, Make, n8n, connection testing, synchronization troubleshooting

Web Development: WordPress, Elementor, Avada, Pagelayer, Beaver Builder, Wix, HTML, CSS, JavaScript, responsive design, GitHub, Netlify, DNS and domain management

AI and Marketing Tools: ChatGPT, OpenAI, Claude, Perplexity, GHL AI, Google Ads, GA4, Meta Lead Ads routing, Jotform, Stripe and payment workflows

Operations: Google Workspace, ClickUp, Monday.com, Notion, Slack, SOP creation, client reporting, quality assurance, technical troubleshooting

PROFESSIONAL EXPERIENCE

GoHighLevel Systems Builder / CRM & Automation Specialist | July 2024 - Present

Independent / Contract Projects

- Architect and configure GoHighLevel environments, including pipelines, stages, custom fields, tags, forms, surveys, calendars, users, permissions, and reporting foundations.
- Build multi-step workflows for lead capture, qualification, routing, assignment, appointment reminders, re-engagement, onboarding, payment follow-up, and internal email or SMS notifications.
- Create region-based and round-robin lead distribution logic with safeguards for manual review, disqualified leads, paused automations, duplicate records, and unassigned contacts.
- Develop responsive GoHighLevel websites, funnels, landing pages, opt-in forms, thank-you pages, and booking experiences connected to CRM records and workflow logic.
- Connect third-party platforms through GHL Private Integrations, API keys, OAuth, webhooks, Zapier, Make, n8n, and REST APIs; map fields and troubleshoot authentication or synchronization errors.
- Configure email and SMS campaigns, domains, calendars, missed-call text back, A2P-compliant consent language, STOP/HELP messaging, and delivery settings.

- Perform end-to-end quality assurance, identify workflow gaps, repair automation logic, document SOPs, and provide implementation and handoff instructions.

WordPress & Web Development Specialist | March 2022 - Present

Independent / Contract Projects

- Build, redesign, and maintain responsive websites using WordPress, Elementor, Avada, Pagelayer, Beaver Builder, Wix, HTML, CSS, and JavaScript.
- Create custom headers, footers, landing pages, blog layouts, forms, interactive hover effects, animations, and mobile-responsive improvements.
- Integrate CRM forms, booking calendars, analytics, payment tools, webhooks, and third-party applications while maintaining accurate data flow.
- Handle plugin setup, DNS and domain configuration, content updates, performance improvements, troubleshooting, and deployment through GitHub and Netlify.

SELECTED SYSTEMS AND PROJECT HIGHLIGHTS

- Designed multi-region lead routing systems with postal or territory validation, manual-review fallback branches, parallel pipeline updates, and real-time owner notifications.
- Built unworked-lead monitoring and reassignment workflows using timed reminders, sales assignment rules, activity checks, and opportunity-stage controls.
- Created client onboarding systems connecting intake forms, CRM records, automated notifications, invoices or payment links, payment confirmation, kickoff, and asset collection.
- Implemented private CRM synchronization across connected sub-accounts, including location ID checks, token-secret validation, connection testing, data fetching, and status verification.
- Built appointment and event systems with booking pages, confirmations, reminders, receipts, follow-up sequences, missed-call responses, and internal team alerts.
- Improved messaging compliance by reviewing opt-in forms, consent language, privacy and terms pages, STOP/HELP instructions, and A2P registration requirements.
- Developed AI-supported workflows for lead qualification, personalized email and SMS follow-up, content generation, data processing, and CRM updates using ChatGPT, OpenAI, n8n, Zapier, and webhooks.
